Sample Document

A demonstration of Borel functionality

John Doe

2024-01-15

Introduction

This is a sample document that demonstrates the capabilities of the Borel markdown to PDF converter. The document includes various markdown elements and shows how page breaks work.

Features Demonstrated

- **Title page generation** with metadata
- **Page breaks** using `<div class="page-break"></div>` tokens
- **Company branding** with logo and footer
- **Professional formatting** with proper typography

Markdown Elements

This document includes:

1. **Headers** of different levels
2. **Bold and italic** text formatting
3. **Lists** (both ordered and unordered)
4. **Page breaks** for proper document structure

Second Page Content

This content appears on the second page due to the `<div class="page-break"></div>` token above.

Lists Example

Unordered List

- First item
- Second item with **bold text**
- Third item with *italic text*
- Fourth item

Ordered List

1. First numbered item
2. Second numbered item
3. Third numbered item with a link

Code and Technical Content

Here's an example of inline `code` and a code block:

```python
def hello_world():
    print("Hello, Borel!")
    return "PDF generated successfully"
```

Third Page - Advanced Features

Tables

Feature	Description	Status
Markdown Support	Full markdown syntax	
Page Breaks		
Company Branding	Logo and footer	
Custom CSS	Styling flexibility	

Blockquotes

> This is a blockquote that demonstrates how Borel handles different markdown elements.
> It can span multiple lines and include **formatting**.

Links and References

Conclusion

This sample document demonstrates the key features of Borel:

1. **Professional formatting** with proper page layout
2. **Company branding** integration
3. **Flexible markdown support**
4. **Easy page break control**

The generated PDF will include: - A title page with document metadata - Company logo in the upper right corner (except title page) - Company name and year in the footer - Proper page numbering - Professional typography and spacing

Thank you for using Borel!
